

## Recycling Policy

Soil and Stone is committed to supporting Government objectives to dramatically reduce the amount of waste sent to landfill.

1. Wherever possible, we will work with our clients to implement strategies to support these objectives.
2. We encourage our clients to collect and recycle as much as possible. Landfill is our last resort.
3. In the workplace, we will encourage staff to separate waste into its relevant waste stream and dispose of it in the correct waste facility.

At Soil and Stone, our recycling policy has the following objectives:

- Cultivate a work ethic which encourages recycling
- Establish an approach to reuse and consume less
- Purchase recycled materials and those that are biodegradable
- Deploy a waste management strategy that embraces reuse and recycling
- Encourage the exchange and reuse of materials and equipment
- Support our clients in developing and establishing their own reuse and recycling policies
